COTO SV, 10" To borrow the expression of a well-known writer, the Territory of Chorado straddles the Rocky Rountains I've a saddle—a part of it being on their eastern flank, a fing on their western flank, and a part of it being taken up the mountains themselves. For many reasons, Colorado is one of the most remarka-

ble sections of country on the face of the earth. Though not geographically, it is, really the centre of the botth American Continent. Up to its giant peals, there is a gradual slope on every side, from the Atlantic on the east, the Pacific on the west, the Gulf of Mexico on the south, and the confines of the Polar Sea on the norm. EL PASO COUNTY.

El Paso County is one of the central counties of the Territory and embraces a fair share of its principal physical, characteristics—mountain, valley, and plain. Along its northern border stretches the Creat Colorado. "Divice," pine-covered mountain spur, which takes its name from the act that it separates the sections of country tributary to the chief rivers of the Ferniory, the Flatte in the north and the Arkansas in the south, "From the "Tivide" the county has a continual slove southward, its southern bouncary being eighteen miles north of the Aransas, the distance from north to south being about forty-two miles. This southward slove—expessing the white of the county, like a garden wall, to the fire similarly—has a marked effect upon its climatic sharheteristics. The distance from the easiern boundary of the change to the foot of the mountains, is about forty miles, and beyond that, the county embraces about the ray in less of mountainus comry, making the total width a sout beventy miles. The area

In like manner, most of the hand, available for stock ranges, having water upon it, has been taken up, and ranches command from \$500 to \$3,000. There can be co could, however, that almost anywhere on the plains, wells dould be sink at a small expense, from which water could be drawn by wind mills or other means. Ne essity has not yet driven the people to invention, but will do so ere long, as every succeeding year makes more and more manifest the fact that that country which has been regard-ell as valueless is in reality of the most valuable character. when a little trouble is taken to aid Nature by the con-

Invances of art.

The Lumber Frade is an important part of the business of the county, there being fourteen milk constantly exgaged in it, and more timber land in El Paso county than any other county in the Territory.

CULORADO SPRINGS. The town of Colorado Springs is situated a countre

of A Paso country at a point where the Monument Creek unites with the Contains of House let and where the Tie Pass opens upon the plains. It is a principal station on the Denver and Rin Grande Railway, seventy-six miles south of Denver the metropo-

his of the Territory, and forty-two miles porth of Pueble, "he town takes its name mon numerous vamable mineral surprise in the immediate neighborhood. The most im at syrings in the immediate neighborhood. The most important of these are grouped together about five miles to the westign a beautiful gien, to witch has been ligiven the dante of Alastion. These are the celebrated "Boiling. Springs," which, years ago, were made known to the word by Fremont, Ruxton, and other writers. Formerly they were visited on account of their medicinal virtues by they were visited on account of their medicinal virtues by the native tribes of pulians, who regarded them as supernative phenomena caused by the direct action of the forest Spirit. In latter times, notwithstanding the difficulty of access to them, their fame has attracted large numbers of it valids, anxious to avail themselves of the healing waters. During the last two year, a arge amount has been expended in aying out and adorning the ground in the neighborhood; handsome, commonious, and comfortable borels have been furth, hath, houses have been fitted upland imany other conveniences provided. Now that these famous burnings are so easily accessible, and that every provision has been find of the comfort of visitors, there can be no donot that a few years will suffice to make them. can be un donot that a few years wil suffice to make them ran de no gonet cara a lew years with indice in make them are girractive a point as is Saratoga in the cast. I nousance will throng to them every year, and many wit take up permiament abodes around them. The springs are seven in umber, and are uneful both for drinking and, bathing purposes, being high y beneficial in viscomanism, skin diseases, general debility, and numerous other ailments which we need not caralogue.

In addition to these wonderful springs, some of the most remarkable and magnificentscenery on the American Continent is in proximity to the town.

Directly in front is Pike's Peak, the most celebrated of the Rocky Mountains, rising to a height of unwards of rateog feet above nua level, its head covered with a snow all the year. Right and left of the lend is a long range of look bill by lend in midsitely diversified with variety of form any other land, "infinitely diversified with variety of form and outline, with rocky crags and turniled bon sers and amount scopes, with constant play of light and shade, with contrast of rich and sombte co-orn, with streams of know and carly groves of pine"—the whole forming a prinorama of exceeding ocauty, of which the evenever tires.

Three miles from town is the wonderful and famous Carden of the Gods," in wrich huge roces, hundreds of lest high, and of the most fantaucostages, and for cous co ora forth a scene which exores the wonder of al woo co oralitarit a scene which excites the wonder of al who behold it. Close to the Garcen is "Gen dyric," with its Queen's Lanon, equally wonderful and beautiful. Eve miles to the southwest of the town is "Cheyense, Lanon," a magnificent gorge, whose suppositions was of roce and peautiful waterfal a give it an amost unrivaled grandestr. Welve miles north is "Mosument Park," student with groups of locky columns of sandstone, which foot the obsishs of some by gone race of ginns.
